Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because of the language indicating alleged benefits. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 rejected under 35 U.S.C. 102(e) as being clearly anticipated by Takada et al.

Takada discloses a smart card connector for receiving a smart card (10) that has contacts pads (16), opposite front and rear edges and laterally opposite side edges (fig. 1A), the connector including a housing (2) forming a card-receiving slot (figures 16 or 20) that opens rearward for receiving the card in movement along a card path when the card is inserted forwardly into the slot (figures 9, 11 & 13), the

housing including an insulative support (col. 5 lines 6-8) and a plurality of contacts mounted (30) on the support for engaging the contacts of the fully forwardly inserted card (fig. 9), the connector including a carriage (40, 41) that is slideable in forward and rearward directions on the housing (figures 4 & 9) and that is biased rearward, wherein; said housing forms at least one upstanding rib (various components unnumbered in figures 17 or 19) lying beyond a side of said card path and having inner and outer rib sides; said carriage has inner and outer largely vertical flanges (e.g. fig. 33) lying respectively at inner and outer sides of said rib (figures 17 or 19), and said carriage has a base (41 in fig. 28) that connects to said flanges and that lies on top of said rib.

Allowable Subject Matter

4. Claims 5-15 are allowed over the prior art of record.
5. Claims 2-4 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is a statement of reasons for the indication of allowable subject matter: The combination of claims 2 and 10 specifically the blade being out of the card's path when the carriage lies in a rearward position and the blade being

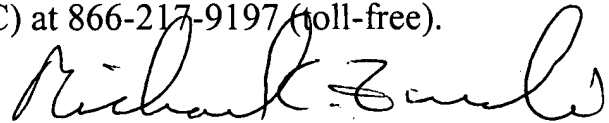

moved into the card's path when the carriage lies in the forward position. The combination of claim 3 specifically the carriage being made of sheet metal. The combination of claim 4 specifically, the double click camming mechanism. Regarding claim 5 the spring that urges the carriage rearward and the carriage being made of sheet metal bent to straddle the rib.
